

Check	MANUAL STARTER KIT LIP BALM
	Manual + checklist
	2 x 10 ml (7,5 g) Lip balm in jar - OBW012 (100% natural)
	1 x 10 ml Fragrance oil for lip balm (food grade) of choice
	SQ-mica 1 x 5 g of choice.....
	Cosmetic glitter 1 x 5 g of choice.....
	Small stirrer

Materials

- Lip balm 10 ml (7,5 g)
- Fragrance oil for lip balm (food grade)
- SQ-Mica
- Plateau (microwaveable)
- Wooden stirrer
- Cosmetic glitter

Manual

Step 1. Take the lip balm jar with the lip balm and place this without lid on the plateau. Heat it in the microwave; depending on the heat setting this takes a few seconds (avoid cooking!). It is important to keep a close look on the lip balm until it is completely melted. **PLEASE NOTE: jar is hot!!! (Parental control is desired)**

Step 2. Take the jar with the lip balm together with the fragrance oil. Add 5 to 10 drops of fragrance oil to the lip balm. Carefully stir the lip balm and fragrance oil with the backside of the stirrer.

Step 3. Open the SQ-Mica carefully. You can take a small amount of SQ-mica by using the backside of the stirrer. Mix the lip balm and the SQ-Mica gently. Add some cosmetic glitter if desired.

Step 4. This step can be skipped in case you do not like glitters in your lip balm. Add the glitter to the lip balm once it is a little thickened and stir slowly.

Step 5. Put the lid (loose) on the jar with lip balm and let cool off for about an hour. You can cool de lip balm faster by putting it in the refrigerator.

TIP

Do you want to give your lip balm a fragrance, color or taste in a different way? Use fresh food products! For example: fresh strawberry juice (by step 2, instead of fragrance oil) or chocolate flakes (add this to the lip balm before heating).
